**The terrain for Model Event this year is a mix of all 5 stages.** Wolski Forest is close to stage V location. What you will find in the forest are deep and diverse valleys (stage I and II) and various rock formations (stage III and IV). In the forest you will find also a high grass. Runnability is generally very good. The road network is well developed.

- Maps are available at training center.
- Map print the same as during competitions.
- We use SI System during Model Event.
- Start from SI Unit in any minute. (in Model Event hours).
- Results of Model Event will be available on our website – [wawelcup.pl](http://wawelcup.pl).
- Control descriptions will be available on the map and also in the start tent.
